Heavy Duty Guy Stake

Technical Data Sheet

These massive 23 inch long super-heavy duty guy stakes are NOT your thin, use-it-once-and-throw-it-away types such as those you see being sold as tent stakes! These are made of thick (.185") galvanized steel angle stock, and NOT the round shapes that some manufacturers sell. The angle steel has MUCH more surface contact with the soil than round shapes, which do not even come close to these in holding ability. This design was made for anchoring guy lines for our line of fiberglass masts, and they perform that function VERY well, but if you really want a "forever" solution for tent stakes, even very large event tents, these might be just the thing!

Material Specifications

Heavy Duty Guy Stake		Part Number GUY-STAKE-23
Description	Material	Plating
Body	Steel	Galvanized

Mechanical Specifications

Size	Dimension
Length	23 in (584.2 mm)
Width	1.5 in (38 mm)
Height	1.5 in (38 mm)
Weight	50.4 oz (1.43 kg)

Compliance Certifications (see product page for current documentation)

Availability Click the following link (or enter part number in the "SEARCH" bar at the top of any page of the website) to obtain additional part information including price, inventory and certifications: <https://mgs4u.com/product/guy-stake/>
